The Next-Generation Touchless Solution

The GT10 offers state-of-the-art technology with facial recognition that keeps your employees healthy and hands-free.

The GT10 employee kiosk enables you to:

- **Ensure health and safety.** Facial recognition removes the need for physical contact when clocking in, minimizing the spread of illness and reducing employee absences.

- **Reduce risk.** Includes tools to help your business comply with applicable data storage laws.

- **Maintain productivity.** Allows employees to attest to daily shift or pay period activity and compliance.

The GT10 is the touchless time and attendance clock that organizations need more than ever today.

Key Features

- High-resolution, 10-inch full-color multitouch display screen

- Real-time data collection

- Robust hardware specifications and design

- Choice of card or facial verification options

- High-quality speakers and microphone

- Flexible connectivity options, including Ethernet and Wi-Fi

- Secure, lockable case

- Battery backup is standard

- Simple to install and configure, including power via PoE

- Wide range of I/O accessories available, including relay module

Adaptable, Robust, Secure

The GT10's flexible, open platform creates opportunities for deployment as an adaptable, simple-to-use kiosk in any market sector. Secure user identification and access to web-based functionality can enhance user experience and drive efficiency.

Designed specifically for continuous use in demanding environments with high traffic, the GT10 is both robust and secure. It features a powerful industrial-grade quad-core processor, together with a range of power options, including Power over Ethernet (PoE) connectivity for fast, cost-effective installation.

Visit peoplesenseerp.com today to find out how the GT10 can meet your touchless time and attendance needs.
