

The Next-Generation Clock Solution

The GT8 offers state-of-the-art time clock technology with multiple convenient scan options for your employees.

Benefits for Your Business

Provide employees with a range of scan options. Employees can punch in with facial recognition (including with masks on), badge scan, or finger scan.

Eliminate risk. Assist your business in complying with biometric data storage laws.

Maintain productivity and ensure accuracy. Employees are able to attest to every shift, helping your company comply with labor regulations.

The GT8 is a cutting-edge time and attendance solution designed for today's fast-paced, ever-changing world.

Adaptable, Robust, Secure

The GT8's flexible, open platform creates opportunities for deployment as an adaptable, simple-to-use kiosk in any market sector. Secure user identification and access to web-based functionality can enhance user experience, provide access to services, and drive efficiency.

Designed specifically for continuous use in demanding environments with high traffic, the GT8 is both robust and secure. It features a powerful industrial-grade quad-core processor, together with a range of power options, including Power over Ethernet (PoE) connectivity for fast, cost-effective installation.
